

# EXTRACTION PRO™

## Encapsulated Carpet Cleaner

ITEM# FCEP

EXTRACTION PRO™  
Encapsulated Carpet Cleaner

WENCO® EXTRACTION PRO™ is a specialized cleaner that is formulated to be all natural and detergent free. The encapsulated technology allows for:

- **Reduced Soil Re-deposition** – keeps the emulsified soils from redepositing back onto the carpet fibers. Any detergent free residue left after rinsing is crystallized for easy vacuum removal.
- **Increases Cleaning Performance 2X** – increase cleaning capacity at a lower cost vs. carpet cleaning chemicals without encapsulation.

Helps keep your carpets stay cleaner longer. It is versatile enough to be not only used for extraction, but for spotting, bonnet cleaning as well as traffic lane pre-spray. Safe for use on 5th generation carpets.

### DIRECTIONS FOR USE

Always test first for color fastness in an inconspicuous area for compatibility. Extraction Pro can also be diluted at a stronger dilution for use as a Traffic Lane Pre-Spray.

#### TRAFFIC LANE PRE-SPRAY:

In a pump up sprayer, dilute at 1:64 – 1:32 (2oz. to 4oz. per gal). Spray on area and let stand 5-10 minutes. Do Not Over wet.

#### EXTRACTION:

Mix with warm water at a dilution rate of 1:64 – 1:40 (2oz. to 3oz. per gal.) in the solution tank.

1. Vacuum area to be cleaned.
2. Clean a small section at a time making sure to overlap with each pass.
3. Avoid over wetting carpet.
4. Let carpet dry completely before moving back furniture.
5. Reset the pile using a brush or carpet rake.
6. clean and rinse out your equipment when finished.

#### SPIN BONNET:

Mix with warm water at a dilution rate of 1:32 – 1:20 (4oz. to 6oz. per gal.) Scrub carpet as you would when spray buffing a floor; side to side.

#### Bucket Method:

1. Vacuum area to be cleaned.
2. Mix according to above directions.
3. Using a mop bucket & wringer, dip your spin bonnet into the solution then wring out to damp-dry.
4. Place bonnet on machine and begin to scrub soiled areas until the bonnet becomes soiled. Turn bonnet over and repeat. As bonnet becomes fully soiled, rinse out in warm water. Repeat step 3 and continue cleaning.
5. Do small areas at a time overlapping with each scrub.
6. A second clean dry bonnet can be used to help speed up the drying process.
7. Clean and rinse out your equipment when finished.
8. Vacuum carpet after it's dry.

### TECHNICAL PROPERTIES

Form.....	Liquid
Color.....	Clear
pH Concentrate.....	9.0 - 10.0
Specific Gravity @ 75°F.....	1.111
Density @ 75°F.....	9.25 lbs Per Gallon
Viscosity @ 75°F.....	Thin
Flash Point.....	None
Stability.....	1 Year Minimum

### AVAILABLE SIZES

- ✓ **4x1 Gallon Case**  
Bottles Contain 25% PCR  
Carton Contains 55% PCF
- ✓ **55 Gallon Drum**  
Reconditioned, Reused
