

# MACHINE DISH COMPOUND

MACHINE DISH COMPOUND

**WENCO® MACHINE DISHWASHING COMPOUND** contains necessary chemicals for water softening and soil suspension. Is ideal for hard water areas. Rinses freely and eliminates water spotting.

## DIRECTIONS FOR USE

It is recommended that washing be done at a water temperature of 140°F.

### FOR DE-STAINING

Soak badly stained china or plastic ware in a solution of 3/4 cup to 1 gallon of water. If convenient soak overnight. Light stains may be removed in shorter periods, and concentration may be increased or decreased as needed; without injury to china or plastic ware.

### FOR REGULAR DISH WASHING

Use 3/4 cup to 15 gallons of water, which covers average dish washing machine tanks. For small hooded or counter model machines, use 1/3 to 1/2 cup. Add more compound as rinse water dilutes solution.

## TECHNICAL PROPERTIES

Form.....	Granular
Color.....	White
pH 1% Solution.....	12.0 - 12.5
Phosphates.....	5.3% P
Alkalinity.....	32% Na <sub>2</sub> O
Chlorine.....	2% Available
Foam.....	None
Solvents.....	None
Biodegradable.....	Yes
Free Caustic.....	None
Solvents.....	None

## AVAILABLE SIZES

✓ **30 Pound Pail**  
100% Recyclable
