ITEM# FCNSL

NU-SOAK LIQUID™
 Liquid Stainless Steel Pre-Soak

WENCO® NU-SOAK™ is a high quality flatware presoak. Use **NU-SOAK™** prior to putting the flatware through the washing machine or hand washing. **NU-SOAK™** will quickly neutralize food acids, penetrate and soften soils. Pre soaking will save time and money by making the wash cycle more effective and thereby reducing the amount of rewashing.

When used with an aluminum foil lined pan, **NU-SOAK™** will de-tarnish silverware without expensive hand work.

DIRECTIONS FOR USE

WEAR GLOVES & EYE PROTECTION

1. Pre-soak stainless steel ware in a solution of 1oz. per gallon of warm (120°F - 140°F) water.
2. Change solution at least three times per day, or each time dish machine wash solution is changed.

CAUTION - Do not use aluminum pan for soaking. Keep container tightly closed when not in use
